

Effects of Oil on Wildlife

10th International Conference

Tallinn, Estonia, 5 - 9 October 2009

Post-conference courses

Laboratories: Friday, 9 October

Advanced Oiled Bird Washing (9.00 - 13.00, Keila Wildlife Hospital)

Facilitated by: Curt Clumpner (International Bird Rescue Research Center)

Participants on this lab will be taken to the Keila Wildlife Hospital where they will receive hands-on tuition on advanced bird washing and waterproofing techniques.

Port-mortem Analysis of Oiled Birds (9.00 - 13.00, Keila Wildlife Hospital)

Facilitated by: Mr. Kees Camphuysen (Royal Netherlands Institute for Sea Research) and Dr. Martin Heubeck (Shetland Oil Terminal Environmental Advisory Group)

This lab provides hands-on experience in the examination of dead marine birds. Participants will have the chance to observe and take part in a necropsy, based on the international procedures outlined in the Handbook on Oil Impact Assessment.

Capturing Oiled Birds (9.00 - 13.00, TBA)

Facilitated by: Mr. Geoff Edmonds (Royal Society for the Prevention of Cruelty to Animals) and Rebecca Dmytryk (WildRescue)

Participants will be taken to a beach side location near Tallinn where they will have the opportunity of practicing bird catching techniques. Please note that no live birds will be used.
